

Company Information

Hockway was established in 1975 to meet the demand of the oil and gas industry for cathodic protection. Today, Hockway offers a complete cathodic protection package from initial investigative survey through engineering design, manufacture of equipment, site installation and commissioning of systems with subsequent planned operational inspection and maintenance.

Hockway has experience in the development of cathodic protection systems for the following applications:

External Protection

- Pipelines (buried and subsea)
- Tank bases
- Well casings
- Process plants buried piping / equipment
- Jetties
- Offshore structures
- Seawater intakes
- Quay walls
- Reinforced concrete

Internal Protection

- Aboveground storage tanks
- Seawater flash evaporators
- Seawater cooling water systems
- Heat exchangers

Hockway provides a "one-stop shop" for the provision of cathodic protection. We cover the full spectrum of activities as summarised below:

We Are Cathodic Protection Engineers - Our experienced team can assist clients in the design and implementation of cathodic protection projects from site survey through system design and supply to commissioning and operational support.

We Manufacture Cathodic Protection Equipment - Our transformers are designed and built in-house to meet the specific demands of cathodic protection applications.

We Supply Cathodic Protection Materials - We stock a comprehensive range of cathodic protection materials and maintain alliances with a number of manufacturers allowing us to provide a high-quality, responsive material supply service.

Hockway UK is headquartered in an integrated workshop and office facility in Redhill, Surrey, UK. The complex is located 10 miles from Gatwick Airport and within easy reach of central London. The all new building is equipped with the most up to date computing, telecommunication and production facilities.

Hockway Middle East is located in Dubai's Solicon Oasis with a state-of-the-art engineering design office and warehouse containing a wide array of standard cathodic protection equipment.
